- infinitely height adjustable

Scope of delivery:

- Bed
- 4 castors with locking brake (parquet castors)

The Hajo bed is a real all-rounder: from an absolutely comfortable extra bed, growing with the baby to an excellent baby bed, Hajo is perfect from day one and accompanies families for a long time.

It thus serves as an extra bed, childrens bed, nursing bed and bassinet.

The advantage here is the sustainable idea that two beds do not have to be purchased within a very short time. The new Hajo bed is ideal for newborns and children up to the age of about 6 years.

The Hajo cot and baby cot has a fully integrated, growing safety gate and three slipping rungs.

Another clear advantage goes to the roomy space: thus the bed is suitable not only for restful child sleep but also for changing the baby at night without having to move it.

Safety and the use of ecologically safe materials are top priorities in the production of the tiSsi®, because the well-being of your child is very important to us.

Safety and quality are top priorities in the production process.

The use of polluting substances is completely avoided.

Care instructions:

The tiSsi® sideboard and baby cot should only be wiped with a damp cloth and then rubbed with a dry cloth. The colours of the tiSsi® may change due to excessive exposure to sunlight.
