

tiSsi®

FAMILY STARTS WITH US. 2025

WELCOME TO THE WORLD OF tiSsi®

These six words are full of heart and soul. With our range of children's furniture, we want to make families' lives safer and more beautiful.

We love to put a smile on the faces of dads, moms, grandmas, grandpas, bonus dads, bonus moms and of course children every day with our products.

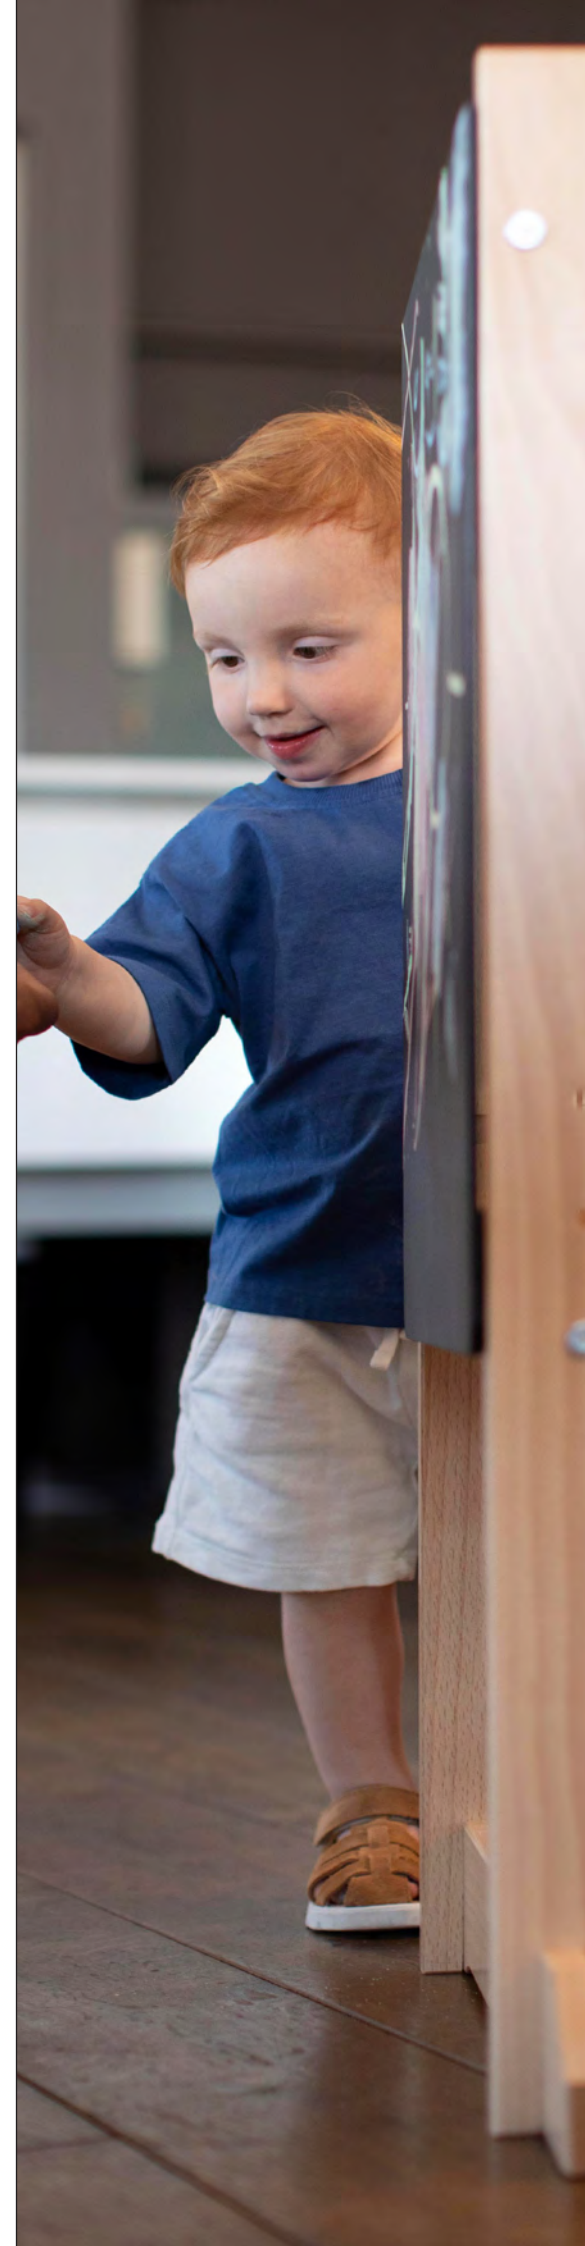

But who are we? My name is Matthias Oster, managing director of M.J. Oster GmbH. First and foremost we are a family business, and as the name suggests, 'family' comes first with us - for the seventh generation running now. We work as a family for families in order to be as close as possible to our customers, large and small.

In a 'family company', the choice of the brand name is of course no coincidence. This is also true for our brand name tiSsi®: We've all heard a child's first attempts to pronounce various names. My younger sister Anna always called me 'Tissi' because she had trouble pronouncing 'Matthias.' This touching and positive memory became the namesake for our successful children's furniture brand.

It is important to us to unleash every individual child's potential for self-development in an environment that is tailored to it. It is us, the adults, who help children through our own and shared interactions, to lead a life that is as self-fulfilling and imaginative as possible. That's why it's particularly important to care for them and let them participate in everyday life. Our loving world of tiSsi children's furniture is created with this in mind.

We want to continue to support families for generations and hope you enjoy browsing through our newest catalog.

Matthias Oster

FOR LITTLE EXPLORERS

THE LEARNING TOWER THAT GROWS WITH YOUR CHILD

PRACTICAL:

Everything is so much easier to practice with the tiSsi® learning tower: Whether baking cakes, preparing soup or washing hands and brushing teeth. Your child is always at eye level with you.

ALWAYS FITS:

Whether at a kitchen worktop, dining table or sink: Thanks to the 3-setting height adjustment, the tower can fit in anywhere.

Safety and the use of ecologically sound materials are our top priorities in the production of the tiSsi® range, as the wellbeing of your child is our main concern.

Safety and quality are top priorities in the manufacture of tiSsi® products. We completely avoid any substances that could cause harm.

The tiSsi® learning tower can be perfectly adjusted to your child's height in just a few simple steps.

The learning tower is a practical aid for everyday life with children, offering an especially safe platform to stand on and sufficient freedom of movement for children aged about 1 to 6 years.

We attach great importance to the fact that the learning tower is only used when the child can stand independently and safely. So we cannot give a general age for use. Our children are all different, and each little miracle develops at their own pace.

- » Product weight: approx. 9 kg
- » Suitable for children from approx. 1 to 6 years old

FOR EATING TOGETHER

THE HIGHCHAIR - A FAITHFUL COMPANION UNTIL ADOLESCENCE

PRACTICAL:

With the highchair from tiSsi®, your little one can sit at the table early on and learn important social interactions. With our newborn set you can bring your child up to your eye level from the first day.

ALWAYS FITS:

Thanks to its unique S shape, the highchair fits at any table, providing a comfortable and ergonomic seat for children from around 6 months.

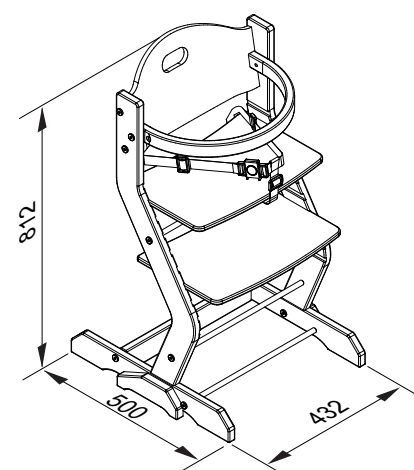

The tiSsi® highchair raises your child to the optimal sitting position and offers additional tip protection - for kids who like to push themselves away from the table.

The matching newborn set enables eye contact and provides a great opportunity to spend valuable time together and strengthen bonding. Your baby is held comfortably in the ergonomically shaped seat. The 2-way tilt adjustment makes it possible to feed them comfortably and safely and without straining their back in the highchair.

HIGHCHAIR

A faithful companion into adolescence

- » Grows with them – even the youngest kids can sit at eye level with you
- » Can also be used as a children's chair
- » Solid beech wood guarantees long durability and high stability

FOR MORE FREEDOM OF MOVEMENT

FAST, FOLDABLE ALL-ROUNDER

PRACTICAL:

No matter the size of the home, whether at home or with the grandparents, our playpens are flexible and offer a comfortable place to lie down and play.

ALWAYS FITS:

tiSsi® playpens can adapt to the situation and can be opened or folded up in just a few minutes.

The foldable tiSsi® LIES and MORITZ playpens are perfect for small and of course large apartments, daycare centers, hospitals and hotels. A safe and comfortable place to lie down is also a must when visiting grandparents!

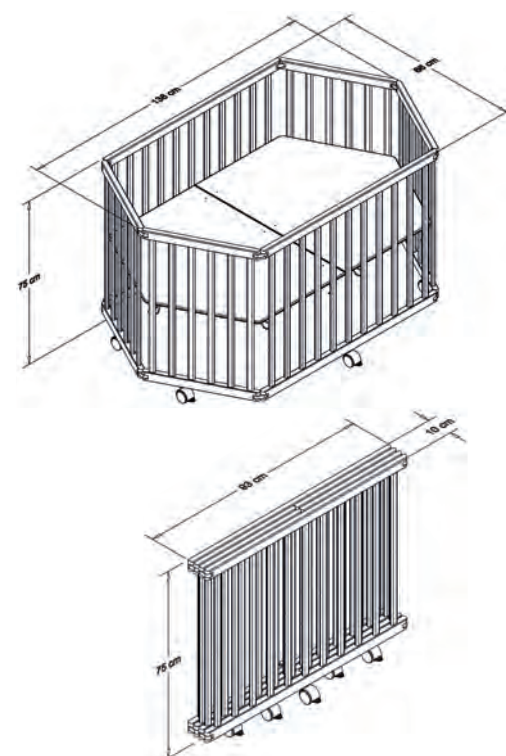

With the tiSsi® playpen, you can always adapt to the conditions at hand. Thanks to the simple, tool-free folding mechanism, this all-rounder can easily be put up or folded away in minutes, as and when required.

Our LIES playpen is also perfect for twins due to its slightly larger dimensions.

LIES FOLDABLE PLAYPEN

Flexible and safe – hexagonal

- » Base plate with cotton cover and soft filling
- » Tool-free assembly
- » Solid beech wood guarantees long durability

FOR DREAMY SLEEP

COMFORT WITH MAXIMUM FLEXIBILITY

PRACTICAL:

The tiSsi® side beds and children's beds can be used from day one. Ensures newborn sleep much better at night because they're close to their parents.

ALWAYS FITS:

tiSsi® bedside cribs are available for all types of beds. And since they are foldable our kids beds also offer the usual comfort when on the go.

The tiSsi® **SOPHIE & MAXI bedside cribs** are perfect from day one. You can keep an eye on your little treasure at all times right next to your bed, without disturbing your sleep! The barred sides included in delivery mean the bedside crib can be transformed into a regular bassinet or full kids bed in just two steps.

The tiSsi® **HAJO bedside crib/kids bed** is a real all-rounder: From an absolutely comfortable bedside crib that grows with you to an excellent kids bed, it fits perfectly from day one so families can use it for a long time.

Our foldable tiSsi® **JORI kids bed** is probably the quickest comfortable sleeping place to set up. In just a few simple steps, the space-saving all-rounder will send your little one to dreamland.

FOR SELF-DETERMINED DEVELOPMENT

MONTESSORI COMFORT
WITH A FEELING OF SECURITY

PRACTICAL:

The tiSsi® ENNO house/floor bed opens up a world of freedom and safety for your child – right from the start. Inspired by the Montessori principle, its low-to-the-ground design allows your child to climb in and out independently. This makes the sleeping area your child's first self-determined comfort zone – without bars, but with a strong sense of trust and personal responsibility.

ALWAYS FITS:

ENNO is made of solid beech – a particularly robust, durable and sustainable natural material. The solid workmanship ensures exceptional stability, which will serve the bed well for many years to come – even during wild play or cuddle time with siblings.

The striking roof frame not only gives the bed a charming, architectural touch, but also creates a cosy sleeping cave with optional canopies, offering children a sense of security and retreat.

Whether plain or lovingly decorated, the roof can be mounted or omitted as desired, adapting perfectly to every stage of development and interior design. **ENNO** is not just a place to sleep, but also a place to play, read and dream. Thanks to its well-thought-out design, it will accompany children for many years – from toddlerhood to well into primary school age.

Natural, stable and child-friendly: **ENNO** offers Montessori comfort with maximum flexibility – day after day.

ENNO HOUSE/FLOOR BED

- » Made in Germany

FOR MORE FUN

THE NEW PLAY EQUIPMENT FROM tiSsi®

PRACTICAL:

Using tiSsi® play equipment independently promotes children's self-confidence in their own abilities.

ALWAYS FITS:

With their soft pastel tones, the indoor climbing frames from tiSsi® not only provide lots of fun, but are also a real eye-catcher in your children's room.

Our climbing toy with a climbing arch, Pikler triangle and slide is a special challenge for little climbers and will make their room into a place for adventure.

Using the toy independently, promotes their self-confidence in their own abilities.

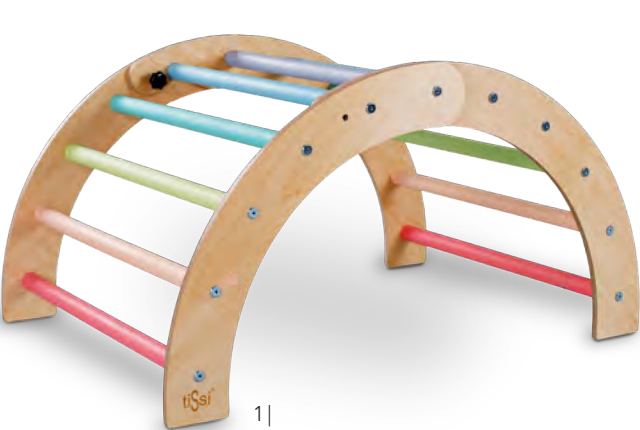

Conquering, exploring and discovering helps them develop important qualities such as body tension, safety and a sense of balance. So they gain strength and a lot of self-confidence.

tiSsi® indoor climbing frames support the acquisition of important foundations for successful movements in everyday life, such as climbing stairs and riding a bike.

PLAY EQUIPMENT

Playing and climbing fun for little explorers

- » Dimensions: 110 x 28 x 1,5 cm
- » Max. load capacity: 60 kg
- » Age recommendation: 1 to 13 years

OUR PROMISE FOR MORE SUSTAINABILITY

Environmental protection has gained massively in importance in recent years with a view to our and the Earth's future. Since becoming a father of three children, environmental aspects have become even more important for me. Children are our future and should be able to live carefree on a healthy planet Earth. To ensure this, more and more people are searching for alternatives that give them a clear conscience, but consistent quality and a good price-performance ratio. Companies like ours are also increasingly expected to care about environmental protection and sustainability.

The topic of sustainability has also become more important at tiSsi®. Although we paid attention to resource-saving production right from the beginning of our company – and we are now in our seventh generation – we still see more options for improved sustainability.

NO PLASTIC PACKAGING

We're all familiar with this: No matter how good a product is, in most cases it's generously packaged with standard plastic packaging. This often useless packaging is particularly harmful to our environment. Of course, product sustainability is an initial step towards improving our planet, but our environmental awareness can't just stop with the transport or packaging of the goods. Our 'tiSsi® – Plastic Free' label is particularly important to us because it immediately shows what is important to our company. We are obliged to pack tiSsi mattresses and fitted sheets with plastic for hygiene reasons. But we are already working diligently on solutions so we can offer an alternative here too. However, for the sake of the environment, we don't use plastic packaging for all of our other products.

MINIMIZING AND OPTIMIZING TRANSPORT ROUTES

Our product materials also have a major influence on sustainability. We've consciously decided to purchase raw materials primarily in Europe. Our transport routes should also be kept to a minimum and only be as long as absolutely necessary. Of course, it would be more cost-effective from a business perspective if we sourced goods outside of Europe. But this creates unnecessarily long transport routes, which are literally poison for our environment and absolutely avoidable. The wood that we source from neighboring European countries is of the highest quality. The trees are always from certified forest stands that ensure the sustainability.

We use many electric vehicles for transport and set a good example here. Another step towards sustainability is that we always have all plastic parts, such as castors and fittings, manufactured in Germany. This allows tiSsi® to guarantee environmentally sound production.

WE WANT TO IMPROVE EVERY DAY

Wherever we have the choice, we will always choose the better, more environmentally friendly variant of delivery, material, production and shipping.

In addition to sustainability, tiSsi® stands for quality, aesthetically pleasing products and excellent customer service.

Because: **Family starts with Us.**
